COUNTRY HOME that offers privacy on a dead end street, close to everything, on 1.5 acres. This 5 bedroom/3 bath beauty offers a front yard for the pets or kids. The back decks are perched in the trees where nature surrounds you with the perfect retreat. 3 bedrooms are on the main level with each of them offering architectural interest with vaulted ceilings (one with a loft/play space). The master suite and 2 additional bedrooms are found on the main level with 2 more bedrooms and two separate living spaces downstairs. The lower level could easily be a separated mother in laws quarters/apartment with plenty of room to add a kitchenette in addition to the large family room. Two separate garages offer plenty of space for a man cave/workshop on the lower level and the perfect place to store your motorcycle. This home has plenty of room to spread out with one of the most outstanding features being a country location with easy proximity to the school, the city center of Camdenton, and the hospital. The location does not get any better than this one. This would be a wonderful home for a large family, or a combined family with the lower level offering many options.
